Site Location: Burbank Water & Power corner of Olive and Lake

Commissioned by: the City of Burbank, CA

Date commissioned: March 2005

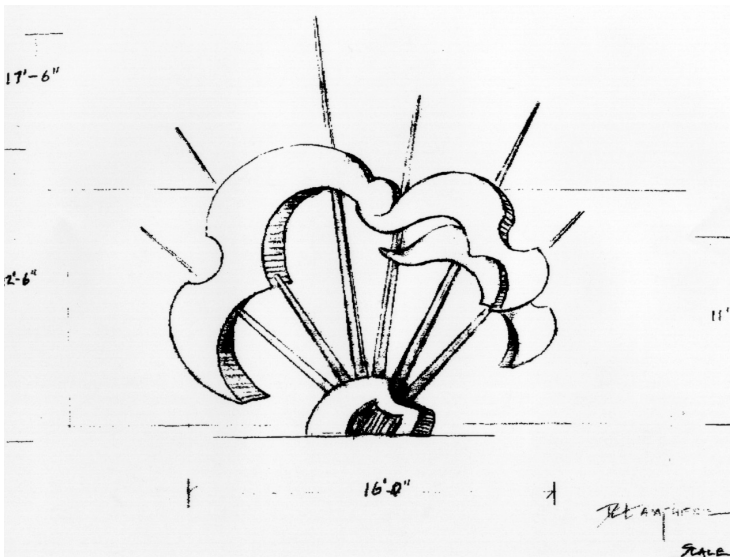

Date installed/dedicated: January 2006

© all rights reserved by artist and/or commissioner

This freestanding brushed stainless steel sculpture titled "Water and Light" playfully echoes the BWP logo. It depicts water resources and exhibits energy beaming upward and outward while suspending whimsical clouds in a buoyant manner. Powder-coated colors from the BWP logo will accent the piece.

The proposed designs were presented and discussed with the Burbank Water & Power Board and the Art in Public Places Committee (APPC) on March 23, 2005, and were determined to be in compliance with the Art in Public Places Ordinance and therefore accepted by the APPC.

The Committee has been working through John Kinkade, Executive Director of the National Sculptors' Guild, for facilitation with the artist Dale Claude Lamphere. Since December 2004, the Committee has received conceptual and refined designs from the NSG design team and enthusiastically supports the proposed design.

**ABOUT THE ARTIST:** Dale Claude Lamphere has previous experience in the design and production of large sculptures. He has completed over 40 large-scale public works, and is nationally recognized with sculpture located from the Basilica of the National Shrine in Washington, D.C., to the Eisenhower Medical Center in California.

**ABOUT THE NATIONAL SCULPTORS' GUILD:** Representing some of the most renowned sculpture artists in the nation, the Guild artists work as a team under the leadership of executive director John W. Kinkade. Our organization works closely with cities, municipalities, corporations and private institutions across the country to successfully enhance both indoor and outdoor venues with creative design and innovative artwork. The NSG design teams have enhanced public spaces in a timely fashion within budgets ranging from \$25,000 to \$2.8 million. When appropriate, the design team grows to include architects, landscape architects, structural engineers, designers and contractors from around the nation. Dependent on the nature of each project, the NSG draws upon this knowledgeable group of professionals with proven accountability in past projects.
